

## **Program YISB workshop**

### **Day 1 (Thursday the 1<sup>st</sup> March 2012)**

10:00-10:30 Welcome and coffee

10:30-12:00 Discussion session:

How do you communicate with each other?

- When you have to present a model study outside the Systems Biology field
- When you would like to discuss your research with other people (dry-wet vice versa)

**Speaker: Barbara Bakker**

12:00-12:15 Coffee break

12:15-13:15 Split the group in the modelers and the experimentalists

- Concept of modeling (for the experimentalists)
  - What is the input/output of a model?
  - What kind of data (quality) can a modeler ask for?

**Speaker: Natal van Riel**

- Concept of experiments (for the modelers)
  - What kind of data can be produced in the lab?

**Speaker: Karen van Eunen**

13:15-14:30 Lunch

14:30-16:30 Bringing the two worlds together. Present a model based on experimental data and validation of the model

**Speaker: Bas Teusink**

16:30-18:00 Drinks + activity (to be determined)

18:30 Dinner

## **Day 2 (Friday the 2<sup>nd</sup> March 2012)**

9:30-12:30 Got a question

Some selected PhDs and postdocs can pose their research questions without trying to sell their work as we normally do during any conference. In the process get a good practice of presenting and interactions with audience.

12:30-13:30 Lunch

13:30-15:30 Career perspectives

Researches from companies/universities will show some career perspectives for systems biologists.
